3. Put detergent in the machine. If you use liquid detergent, put them in before the clothes. However, powder detergent need to sit on top of the washing.
4. Put the dirty items in the machine. Don't overload the machine. If you pack it too tightly, there's less room for the machine to agitate the dirt out of your washing. The best way to get a correct load is to weigh it to fit in with your machine's capacity.
